DigiBit introduces new aria products in Hi-End Munich

*DigiBit is introducing today at Hi-End Munich a DAC and Linear Power Supply options for the **aria music server** and its new **aria mini music server.***

aria music server

DigiBit is introducing today in Hi-End Munich 2014 the DSD DAC and Linear Power Supply options for its **aria** music server**.** Introduced in Hi-End 2013, **aria** is a no-compromise music server system, sure to please both audiophiles and music lovers with large collections of albums, for whom a powerful and easy-to-use music library management tool is key. **aria** is the only music server on the market to support an unlimited number of extended metadata fields for any music genre. Users can sort and view their music collection in multiple ways such as: albums from the romantic (Period) for piano (Instrument), played by Maurizio Pollini (Soloist).

aria incorporates latest state-of-the-art technologies, such as support for **"Bit Perfect"** files, error-free automatic ripper, up to **32bit/384KHz** music files and **DSD64/128**. aria comes with up to 4TB of internal storage in HDD or 2TB in SSD, more capacity can be added with external NAS and HDD.

aria supports **multiroom** installations and stream music to **Airplay™** and **DLNA**™ compatible devices. You can listen your music collection with headphones in high resolution 24-96 on your iPad. Besides, any program available in the iPad can be streamed to aria server.

The free multilanguage iPad app that controls aria is extremely easy to use, yet is powerful with unique music library views, playlists management, intelligent search engine and tagging capability for all 18 fields. **aria music server** has been available since October 2013.

The new optional **DAC** (32Bit/192KHz and DSD64/128) provides balanced (XLR) and unbalanced (RCA) analog audio outputs. Besides, an asynchronous USB 2.0 digital output is provided for convenience.
The also new optional **linear power supply** replaces the standard aria' switch mode PSU and provide a clean and noiseless voltage to both aria electronics and the DAC.

aria music server, the DAC and Linear Power are available now. aria's MSRP starts at 4.000€ (included VAT) with 2TB HDD with Raid 1 w/o DA, the DAC option adds 695€ (VAT included) and the linear power supply 640€ (VAT included).

aria mini music server

To be introduced in Hi-End 2014, **aria** mini has been designed for budget conscious users that also appreciate lifestyle designs that match modern home décor. In spite of its size, **aria** mini incorporates a fanless design with very low power consumption so can always keep it on ready to play your favorite music. Its practical dock allows to recharge your iPad™ via USB. **aria** mini comes with 1TB of storage, additional capacity can be provided with external HDD or a NAS. Its built-in DAC supports the latest technologies such as DSD64/128 and up to 32bits-384KHz formats that provides audiophile sound quality plays.

On the software side, **aria** mini brings the unique extended metadata fields capability of DigiBit's music server products.

Aria can play different music programs in different rooms by streaming to **Airplay**™ and **DLNA**™ compatible devices. You can also listen your music collection with headphones in your iPad. Besides, you can stream your favorite internet radio or music services of your iPad to the aria mini server.

The free multilanguage iPad app that controls aria is extremely easy to use and still very powerful with unique music library views, playlists management, intelligent search engine and tagging capability. **aria** mini will available in Q3 2014. Price TBA.
